Trust Maytag

Whether you've had a tough day at work or are returning from a family vacation, there's something comforting about coming home. You expect your home to be a comfortable place for you, and Maytag understands your expectations. When you buy a Maytag air handler, you can count on a dependable product that will help keep your home comfortable for many years to come.

How Does an Air Handler Improve My Indoor Air Quality?

An air handler can increase your overall comfort by minimizing the amount of stagnant air you have in your home. When paired with an air conditioner, it circulates cool air throughout your house during the summer. When an air handler is matched with a heat pump, it works all year long, circulating cool air in the summer and warm air in the winter. Ask your Maytag heating and cooling dealer how an air handler can improve your home comfort.

Depend on Maytag

Just as you expect from Maytag, Maytag air handlers offer one of the best warranties available in the industry. The 12-year Worry-Free Limited Warranty on parts reflects Maytag's commitment to you. Ask your select Maytag heating and cooling dealer for details or click on the warranty logo for more information.

Maytag's Worry-Free Performance

Below are key features and benefits of Maytag air handlers.

- A Maytag air handler, when combined with a Maytag heat pump or air conditioner, offers a full line of quality split system heating and cooling.
- Durable, attractive cabinet is designed using galvanized steel with a polyurethane finish which resists corrosion 50% better than comparable units.
- Plug-in wire connections and built-in filter rack makes the air handler easy to service.
- The wall-mount unit can be installed in a single family or multi-family residential dwelling.
- Multi-Speed models allow you to set your heating and cooling speeds to your desired airflow and also allows for flexibility of installation.
- Variable-Speed models allow for 12 selected cooling airflows and 4 heating airflows to match any application which also results in improved air quality by optimizing humidity removal and filtration capabilities.

Completing Your Indoor Comfort System

Air Conditioner or Heat Pump: Your air handler is designed to make your Maytag air conditioner or heat pump to perform at maximum efficiency levels.

UV Air Purifier: Installing an ultra-violet accessory on your furnace or air handler helps eliminate odor-causing mold and fungus that can develop in an evaporator coil or drain pan.

Programmable Thermostat: The thermostat automatically adjusts your indoor temperature to accommodate both your home and away schedules, thereby reducing energy costs.

Humidifier: Climates with dry air can irritate skin and trigger allergies, as well as cause furniture and drywall to crack. A whole-house humidifier helps maintain appropriate moisture levels within your home.

Electronic Air Cleaner: Improve indoor air filtration with an electronic air cleaner that removes 95% of household allergens, such as dust mites, pollen and smoke.
